# ENHANCING INNOVATIVE TEACHING, WROCLAW, MAY 20-24, 2024

The Department of Foreign Languages of Wrocław University of Science and Technology strives to improve the way we approach teaching on a daily basis. We constantly aim at being innovative while applying various teaching techniques to motivate our students but also to meet their needs.

- How to adapt teaching to the hectic pace of today's constantly changing world?
- How to keep our students engaged?
- How to best recognise their needs?
- How to help develop soft skills in a future scientist/researcher/IT specialist/valuable employee?

During International Week we'd like to share our experiences of innovative language teaching techniques. We hope our guests will exchange their ideas on successful engagement of the students, during the number of activities that will include **workshops, formal and informal discussions, guest teacher presentations, and observing students' work.**

## Who is it for?

We would like to invite university language teachers of foreign languages but also those who teach other university subjects. In our interdisciplinary groups we offer tuition to students from faculties of **Architecture, Civil Engineering, Chemistry, Information and Telecommunication Technology, Environmental Engineering, Mechanical and Power Engineering, Pure and Applied Mathematics.** The working language is English.

## Contents

Participants will:

- take part in workshops
- take part in the crash course of Polish language
- observe the work of our student to discover their skills and abilities
- meet colleagues to share experience and find possible future areas of cooperation
- enjoy the city tour around Wrocław and the university campus

**Wrocław** is a capital city of Lower Silesia region in Poland. Situated close to the borders with Germany and the Czech Republic this one-million city offers fantastic atmosphere, rich academic environment and vast cultural and entertainment offer. Wrocław University of Science and Technology is one of the leading scientific and educational centres in Poland. Every year it offers tuition to over twenty-three thousand students.

**All events are free of charge. Participants cover travel and accommodation costs and costs of any meals that are not included in the programme.**

**SUITABLE FOR ERASMUS TEACHING MOBILITIES**
